NORTH VIETNAMThe Use of Half-tires in Revetment Construction

Recent photography has revealed at least one of the uses being made of the tires which have been stockpiled in huge quantities in the Haiphong area over the past year. Most of these tires came from the Soviet Union as general cargo aboard merchant ships. The North Vietnamese are apparently using the tires, cut in half, as an expedient method of constructing and repairing revetments, particularly those associated with AAA sites.

25X1D

[ ] coverage of a AAA site under construction in the Haiphong port area shows half-tires arranged in a semicircular revetment pattern prior to being earth covered (see Figure 5). Half-tires are also in evidence at a number of other revetted positions around the Hanoi and Haiphong complexes.
